Professional Summary

AI Product Manager with 6+ years driving 0-to-1 Generative AI product strategy for askEdgi, OvalEdge's B2B Data Governance SaaS platform. Took the OvalEdge Marketplace from concept to launch, building 15 AI agents, opening a new monetization channel, and onboarding 3 customers. Directed AI transformation and adoption strategy using RAG and prompt engineering, lifting enterprise adoption by 50%, and built the OvalEdge MCP server connecting Claude, Cursor, and other AI clients to platform metadata. CSPO | AIPO | IBM Generative AI for PMs.

Experience

Senior Product Owner (Product Manager) **06/2023 – Present**
OvalEdge India Pvt Ltd – B2B Data Governance SaaS *Hyderabad, India*

- **Product Marketplace (Platform 0-to-1):** Designed and launched the OvalEdge Marketplace, creating 15 Data Governance AI Agents and monetizing the channel, which led to onboarding 3 customers and boosted marketplace adoption.
- **AI Transformation & Product Strategy:** Redesigned askEdgi's NLP model using RAG and prompt engineering, improving AI feedback loops, driving a 50% adoption increase among non-technical enterprise users within 6 months.
- **Roadmap & Leadership:** Owned product roadmap and quarterly prioritization for AI platform capabilities, running weekly scrum stand-ups and partnering with the CTO, VP Engineering, and CEO on roadmap, pricing, and infrastructure decisions to align delivery with business priorities.
- **MCP Server for Discovery:** Built the OvalEdge MCP server and tools, enabling Claude, Cursor, and similar AI clients to fetch OvalEdge metadata directly, replacing manual metadata lookups with automated agentic execution and Take Action workflows.
- **RAG and DeepEval:** Drove RAG integration for askEdgi and improved retrieval quality using DeepEval-based LLM evaluation, raising answer accuracy by 30% and reducing hallucination risk in governance-critical query flows.
- **AI Data Classification:** Built an LLM, cosine similarity, fuzzy matching, and Levenshtein distance pipeline achieving 95% accuracy in GDPR-sensitive data tagging, accelerating data transparency by 70%.
- **Experimentation & A/B Testing:** Designed structured A/B experiments on askEdgi's interface and onboarding flows, using Google Analytics and user feedback to identify friction points and guide targeted UX improvements.
- **AI Data Governance Agents:** Architected AI agents that store reusable analytical workflows using JSON-based structured storage within askEdgi, enabling users to save, organize, and re-execute queries, cutting repeated analysis effort by ~50%.
- **Delivery Throughput:** Managed 200+ user stories across 50+ BRDs, achieving a 95% on-time release rate across 12+ sprints.
- **Governance Requirements:** Orchestrated requirements for Business Glossary, Data Classification, and GDPR ROPA modules via SAFe, accelerating workflow automation by 30%.
- **UI/UX & User Experience Strategy:** Led a team of 5 in Figma-driven redesigns, driving a 20% increase in B2B software adoption, and conducted UAT across 12 modules, resolving 90% of pre-production issues before go-live.
- **Workflow Optimization:** Built an AI workflow library (Claude Skills, Gemini Gems) for PRD/SBD authoring and user story creation, cutting PRD/SBD curation time from 3 hours to 1.5 hours and user story completion from a full day to 4 hours.

Associate Consultant – Product & Delivery **02/2019 – 11/2021**
Atos Syntel *Mumbai, India*

- Bridged product and engineering as the primary liaison between business stakeholders and a 20-member team for a 500+ user ITSM platform, gathering requirements, defining acceptance criteria, and translating business needs into technical specifications.
- Owned end-to-end platform rollout, scoping delivery, leading stakeholder communication, and tracking sprint progress, achieving a 23% boost in user satisfaction, a 30% reduction in response times, and a 25% lift in operational efficiency.
- Facilitated weekly root-cause analysis sessions to surface workflow bottlenecks, driving data-driven process improvements that cut resolution times by 30%.

Skills

Product: Product Strategy, Platform Product Management, 0-to-1 Development, Product Lifecycle, Roadmap Planning, Go-to-Market Strategy, Stakeholder Management, Cross-functional Leadership, Agile/SAFe, Scrum, Sprint Planning, User Story Design, OKR-based Prioritization, KPI Tracking, North Star Metrics, Data-driven Decision Making, Jira
AI & Data: Generative AI Product, AI Product Strategy, LLM Integration, RAG Systems, Prompt Engineering, Agentic AI, AI UX Design, Data Governance, Data Classification, GDPR/CCPA/ROPA, Data Lineage, Metadata Management
Analytics & Tools: A/B Testing, Google Analytics, SQL, Figma, Google AI Studio

Certifications

CSPO, AIPO, Generative AI for PMs (IBM), IBM PM Professional Certificate, Fundamentals of AI Agents Using RAG & LangChain

Education

Great Lakes Institute of Management, Chennai, India 06/2022 – 06/2023
Post-Graduate Program in Management (PGPM) – Marketing Major, Analytics & Operations Minor

Vidyalankar Institute of Technology, Mumbai University, Mumbai, India 06/2014 – 06/2018
Bachelor of Engineering – Electronics Engineering
